### 4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

Effective classroom management involves developing productive learning environments that foster positive learning dispositions and responsibility for learning among students. This course is included to enable students to develop an understanding of the theory and practice of classroom interaction and culture that will enhance teachers' effectiveness in engaging students in productive learning from K-12.

By developing informed, reflective practitioners, classroom teachers will be equipped with the classroom design and management tools needed to be able to create and maintain safe, caring and challenging learning environments in K-12 settings.

### 5. TEACHING STRATEGIES

- Explicit teaching including lectures using a range of teaching strategies to foster interest and support learning;
- structured occasions for reflection on learning to allow students to reflect critically on issues discussed;
- extensive opportunities for small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate, to question and to problem solve
- use of Moodle and discussion tools to provide extra learning material and the capacity for online discussion

These activities will occur in a climate that is supportive and inclusive of all learners.

## **Assessment Details**

### **Assessment 1 – Evidence based practice guide (50%)**

Create a behaviour management guide for beginning teachers at either the primary or high school level. Choose three evidence-based practices from the list given. Research to find a journal article that supports the use of each one **through the reporting of a research study**.

These articles should be current (within the past twenty years), from a peer-reviewed journal, and **reporting original research**. Use the information in the article to complete the matrix (available on the course's LMS site), that will be the body of the guide. Part 2 of this assessment should include a discussion that describes the importance of having a solid knowledge base of research- based behaviour management strategies and interventions based on the literature.

The practices should be well-aligned with each other and a particular philosophy and be appropriate for the stage of the population you will be teaching.

The evidence you provide should be from journal articles from the last twenty years. These should be referenced using APA style. Articles must be sourced from high-quality peer-reviewed journals. You should include a minimum of five (5) citations.

### **Assessment 2 – Classroom Management Plan (50%)**

This will consist of three parts-Philosophy, Theory, and Practice. Within the Philosophy section, students will include their personal beliefs about the nature of student misbehaviour and their beliefs about the role of the teacher as manager in the classroom. In the theory section, students will include which theorists their beliefs most closely align with, and a brief description of the central tenets of the chosen theorists. In the practice section, students will include: rules, codes of conduct, class motto, curriculum and pedagogy, lesson planning, procedures and routines, technology use and management, and emergency plans for inclusive classroom management. These practices should be supported by citations to current literature in the field (minimum 5). Please refer to the proforma at the end of this course outline for structure.
